Phill Kline
Former Kansas Attorney General

As seen on Fox News Channel, USA Today, the O'Reilly Factor and other media outlets, Phill Kline is a real life story of David and Goliath—taking on the one billion dollar abortion industry.

Kline, the former Attorney General of the State of Kansas, was the first and only prosecutor ever to succeed in obtaining abortion records from Planned Parenthood and notorious late term abortionist George Tiller—bringing down the wrath of the abortion industry nationwide.

You will not want to miss hearing how Phill Kline changed the course of the national battle forever by placing Planned Parenthood on the defensive after exposing the alleged crimes within their clinics.

Ellen Salter
Pro-life Mom, Defender of Life

Ellen gave birth to Meghan, their fourth child, in October 2002—another healthy baby girl. Less than two months into Meghan's life, she started developing serious problems. Her limbs grew limp with no explanation. Then, one day as Ellen was toweling her off after a bath, Meghan stopped breathing. That day Meghan was flown for the first time to the University of Michigan's Mott's Children's Hospital in Ann Arbor with many more helicopter flights in the years to follow along with regular surgeries on her spine to help her breathing. Meghan's mysterious health problems continue to baffle doctors.

Meghan's communications are limited to opening her eyes, smacking her lips, making soft sounds with her voice and flashing an occasional smile. There are people who have told them they should take their daughter off her ventilator so they could "get on with their lives." You will want to hear this inspiring story of faith and love that binds this family together.

Conference Registration:

Please detach this portion and return by **September 15** for discount. See back for credit card payment.
